

As the trusted industry leader in home intercom systems, Legrand intercoms offer a combination of functionality and aesthetics found nowhere else on the market

The Selective Call Intercom System is the most advanced intercom in the industry, supporting up to 32 locations per unit. With a simple, intuitive LCD interface, the system allows the user to customize room names and door tones. Selective Call, offered exclusively in the contemporary Studio Design, features hands-free reply so users can respond to calls from anywhere in the area of the unit. Those with busy homes will appreciate the system's support of three simultaneous conversations – mom can call the kids while dad greets the guests at the front door
