

Products:
rf lighting control

The RF Lighting Control system allows homeowners to control lights, ceiling fans and small appliances from anywhere in their home, providing the ultimate in living simplicity and energy savings.

Legrand's RF Lighting Control products are perfect for a single room, a group of rooms, or the entire home thanks to our wide selection of versatile products. Our dimmers and switches operate all common lighting types and can work together to create a customized lighting scene. The scene controllers, available as both in-wall and remote controls, allow users to program up to four scenes in a single controller. Once configured, you can set your lighting scene with the touch of a button. RF Lighting Control can also be connected easily with the Unity Home System, providing further control of the home's lighting and other small loads.
